

## Introduction to ISO14064 – GHG Accounting and Verification

### 1 day briefing workshop

Climate change affects all parts of the economy; more and more organisations are having to think about how they need to respond in order to move sustainably into a low carbon economy.

Responses may include strategic accounting for carbon intensity of an organisation, energy efficiency programmes, carbon offsetting, management of carbon embodied in products and /or supply chain etc; along with public reporting for regulatory and/or reputational reasons. To support these responses the International Standards Organisation has introduced ISO14064; this standard covers the accounting of GHG emissions from organisations and projects, as well as protocols for the verification of inventories and published information

This intensive briefing is designed to give organisational management an overview of the requirements of ISO14064; how it interfaces with other systems (eg ISO9000, ISO14000 etc) and to determine whether it is an appropriate mechanism for their corporate accounting.

#### **Sessions will include :**

- **scope and applicability of the standard**
- **accounting rules and principles**
- **basic requirements for implementing the Standard**
- **integration with existing accounting and management systems**
- **how the standard can facilitate companies strategic responses to climate change**

Delegates do not require any prior climate change or emissions accounting knowledge to attend this workshop.

This workshop is supplemented by more detailed courses covering the development of emissions inventories; accounting and data management systems; and emissions audit (both for internal and external purposes).

Public sessions are normally held at the Warwick Business School, Coventry, UK; venues in London and Manchester. Bespoke courses can be arranged in a venue to suit the client, subject to suitability for training purposes.

Dates of public courses will be published on our website and will be notified to clients that have expressed interest in the courses. Bespoke courses can be arranged at any time, by mutual agreement.

**Indicative Delegate Fee : £375 plus VAT**

Multiple delegate discounts are available, please contact Future Perfect for more details.
